

# Barry's just turned cabinet technology inside-outside.

Introducing Barry's revolutionary new "Alfresco" range of outdoor cabinets, constructed using Barry's 'X-L8', exterior laminate that withstands the excesses of Queensland's climatic extremes. Now, you can create outside entertainment areas or storage units that are beautifully weather-resistant.

Even better, "Alfresco" cabinets are available in a range of standard sizes, or can be made-to-measure – making them perfect for everything from outdoor kitchens to pool storage, work units, toy boxes, etc

For further information and details see your local Barry's Design and Display Centre, or visit our website. [www.barrys.com.au](http://www.barrys.com.au)
